

RESEARCH DOSSIER

Child population

2007–2025: 22.3 → 21.38.

21.38 | Million people

What the data shows

01 What the data shows

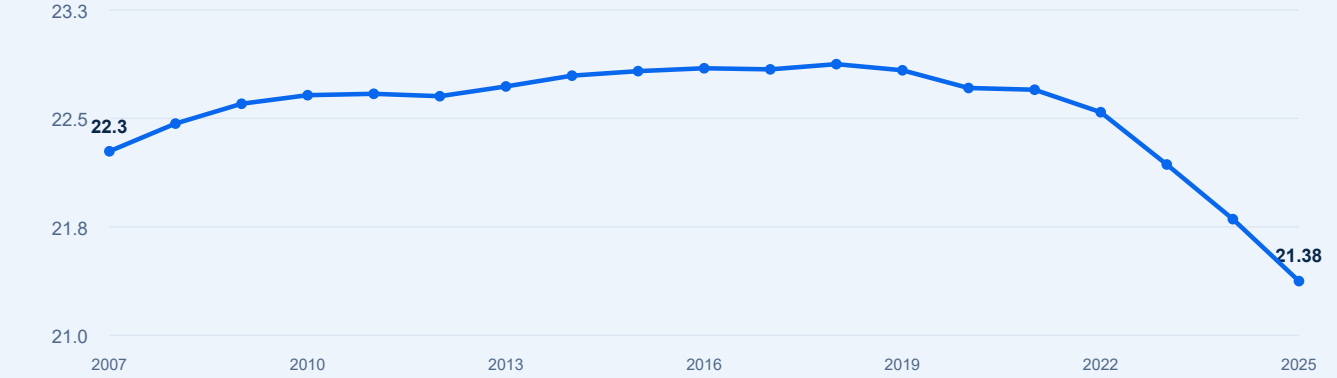

02 Method and calculations

01 What the data shows

Child population was 22.3 in 2007 and 21.38 in 2025, measured in Million people. The absolute difference is -0.92. The 19 observations show how the indicator evolved within the period. Ages 0–17. Observed registration data, not projections.

TÜİK

Ages 0–17. Observed registration data, not projections.

02 Method and calculations

Consider periods, units and coverage together. Indicators alone do not establish cause and effect.

Source and coverage

This research covers the stated period and does not replace subsequent releases. Sources checked: 7 September 2026.
